

AQUAPOROUSGEL

Excellent hydrophilicity

Water floating polyurethane sponge (yellow) and water sinkable AQUAPOROUSGEL "CC-10B" (white)

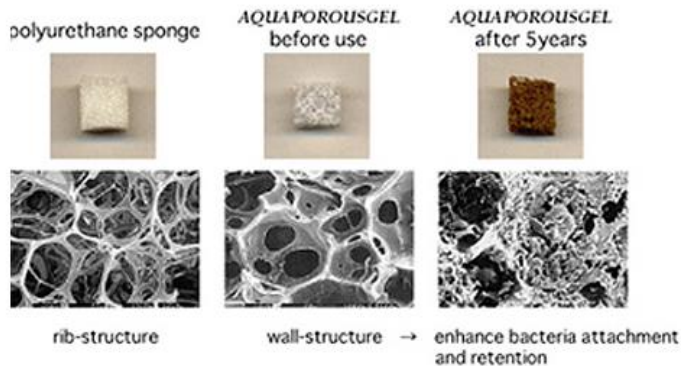

* Characteristics

Excellent hydrophilicity

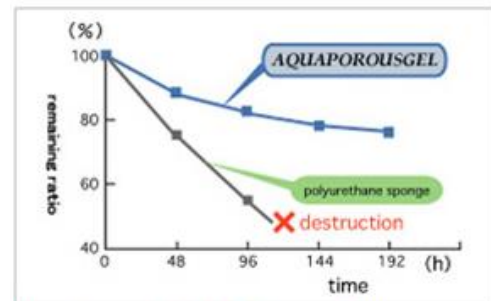

The wall structure of AQUAPOROUSGEL absorbs water and provides a hydrophilic surface for chemical-degrading bacteria to attach to and colonize

High bacteria affinity

High wearability

accelerated abrasion test

Long time achieved by high wearability

item	CC-10B
material	polyurethane (multi-porous gel)
appearance	cube
size	10mm (swelled)
density	30dry-kg/wet-m ³
